

Durable Steel Construction

- Manufactured in the USA
- Made from rolled galvanized steel
- Powder-coated for tough, corrosion-resistant lifetime of use

Power & Design

- Ametek Lamb 7.2" 2-stage tangential bypass motor provides powerful cleaning capabilities

HEPA bag filtration

- Large multi-layer disposable HEPA-style bag
- Inner liner adds more strength and resistance to bursting

Power Unit Specifications

- 7.2" Premier 2-Stage Tangential By-Pass Motor
- Multi-layer Disposable HEPA-style bag
- 27 Qt. Dirt Capacity
- DB Rating w/ Vented Exhaust: 70
- Power Unit Dimensions
 - Diameter: 12-7/8 in.
 - Height: 26 in.
- Up to total Sq. Ft. : 10,000

Motor Specs

Voltage.....	120
Max Amps.....	15.8
Max Airwatts.....	631
Airflow.....	121 CFM
Sealed Vacuum.....	142 "H ₂ O

Bag Replacement #: HPB2H

Improve allergy and asthma symptoms

By venting your central vacuum system outside, you remove the dirt and allergens from your home. By ridding your home of these allergy causing irritants, you can improve allergy and asthma symptoms, as well as the air quality in your home.

Proudly manufactured in the USA since 1956

We strive to provide high quality steel vacuum systems at an affordable price. And, we are proudly made in the USA.
