

Durable Steel Construction

- Manufactured in the USA
- Made from rolled galvanized steel
- Powder-coated for tough, corrosion-resistant lifetime of use

Power & Design

- Two Ametek Lamb 7.2" Premier tangential bypass motors provide extreme cleaning power and performance
- Split Canister Design - Hang the 14" dirt canister in an easily accessible location & the motor in a location away from the living environment
- AirChannel™ - Allows a can liner to be used for mess-free debris disposal

Cyclonic Filtration

- Cyclonic filtration
- No messy filters to clog or clean. Virtually 100% sustained cleaning power.

Power Unit Specifications

- Two 7.2" Premier tangential by-pass motors
- Cyclonic Filtration
- 38 Qt. Dirt Capacity
- DB Rating w/ Vented Exhaust: 78
- Dimensions

<u>Power Unit</u>	<u>Dirt Can</u>
Diameter: 13-5/8 in.	Dia: 16-1/8 in.
Height: 30-3/4 in.	Ht: 40-1/4 in.
- Up to total Sq. Ft. : 18,000+

Motor Specs

Voltage.....	240
Max Amps.....	16.4
Max Airwatts.....	1268
Airflow.....	229 CFM

Improve allergy and asthma symptoms

By venting your central vacuum system outside, you remove the dirt and allergens from your home. By ridding your home of these allergy causing irritants, you can improve allergy and asthma symptoms, as well as the air quality in your home.

Proudly manufactured in the USA

We strive to provide high quality steel vacuum systems at an affordable price. **And, we are proudly made in the USA.**
